ML: Estimate for Rs 25,830/- for improving water
supply to N. R. Extension in Mysore City
✓ 2730

Letter No C2 PR 30/48-49 = dated 29-9-48:
from the President, City Municipal Comm.
Mysore on the above subject

The President states that it is very
necessary to ensure adequate water supply
to the N. R. Extension in Mysore City as
numerous complaints were received &
that the Executive Engineer, Water
Supply Dept. has sent an estimate for
Rs 25,830/- for improving the water supply
in the area by laying a 6" & 9" main
from the Edifica Tank, which is the highest
point in the locality and linking
to the 6" & 9" line in Asoka Road
The M.C. have passed a resolution
on 11-9-48 approving of the ^{recommended} ~~estimated~~
of the Standing Committee in this
behalf. The cost being included
in the 1946-47 budget sanctioned for
the immediate improvement of water
supply in Mysore City (with no. L
24124) 3674-61 ML 67-48-49 & 12-11-49

ML 2735

52730

in Rs 25,830 for improving water
R Examine in Mysore city

The Pdt requests immediate sanction
of Govt to the abovementioned resolution
of the MLC. He has also explained how much
of the estimate cannot be met out of the normal
budget provision for water supply improvement
in the current year's budget as it would be
prejudicial to the routine water supply
works and how savings is expected
from the 6th 6th scheme to the extent of
Rs 40,000 as a result of not taking up
the work of extra filters.

2) He may be mentioned here that
the estimate for Rs 25,830 for which
sanction is sought is not enclosed.

If approved, it will be called for
for the DE letter of the Pdt. The Pdt. for
10 10 48 by Mltus & Sanjivan is also kept below
(Step B)

31/11

12.2) Letter No C 2 PR 30/48-49 dated
26th October 1948 from the Pdt
Mysore City M C C on the subject-

9) In this office letter No 23893 of 10-11-48
the estimate for Rs 25830 referred to
was called for. The Pdt states that
the estimate has been sent to the
Executive Engineer with letter on
Bangalore for further work on
on hand in view of urgency and
that he has been addressed to send a CO

ML
308

Estimate for Rs 25,830 for improving
supply to N-R Extension in Mysore
thereof to Govt-

10) As regards the source for
meeting the cost, the Pdt states
this is a major capital improvement
work and not a mere laying of
out main and that the cost should
be treated as part of the loan scheme
and not as an ordinary work
like Contingent that this should be
included in the Rs 6.64 lakhs loan
scheme sanctioned for the Band range
improvement of water supply to Mysore City
and that it has been approved by the
M.C.C. on 11-9-48

JHOR
5 11-48 || This President at his job
repeatedly state is fond of
creating embarrassing situation
and bringing pressure to bear on
the Govt. to obtain sanction
works

for one thing, he wants sanction to an
estimate for Rs 25,830/- for improving the
water supply to N R Extension in Mysore
But he has not sent the estimate when
it was called for he says that

has been sent to the Executive
Engineer water supply Division where also
has been requested to send a copy of the same
to Govt. How can then the estimate be
sanctioned unless we are which should be
sanctioned by the Chief Engineer for distribution
before creating sanction?

13 Secondly, a straight question was asked as to
how the expenditure could be met but what
proportion by the Govt & the M.C.C.? He does not
answer this question in a direct manner, but
he states that it should be included in the

664 lakhs loan scheme sanctioned for the short-
term improvement of water supply in the city.
It is stated that the question of taking up

the extra filter under the above scheme
not being to be taken up & that there
would be savings of Rs 40,000/- in the above
scheme but a diversion of this savings

to the extent of Rs 25,000/- would require the
sanction of Govt. Accord to the above.

The expense will have to be met in
equal proportions by the Govt & the M.C.C., about
which the M.C.C. should pass a definite
resolution. From the way in which the question
has been written to Govt, it looks as

the entire charge have to be met by the

first

14) In view of the urgency of the case, funds may be used to proceed with the work, pending orders on the question of the apportionment of the estimated expense, which should be borne in equal proportion by the four the U.S. In the present, the same expense out of the same limited out.

15) It was not however proper for the President to have himself asked the Executive Committee to take up the matter to take up the work in hand while it was a question that should have been asked by the first

revised 6/11/48

6952
- 6/11

16) I fully agree with the views of the Asst Secy. In such urgent matters the President should furnish full information & necessary reference for to facilitate quick decision being taken by Govt. In this case the estimate itself is not sent but immediate orders of Govt. are sought for in respect of it.

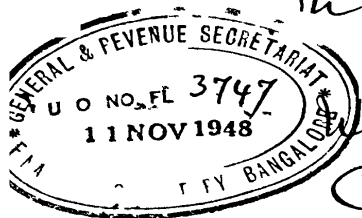

17) The total cost of the

ML 3308 Estimate for Rs 25-830 for improving
the water supply to N R Extension in Hingur.
estimate is said to be Rs 25-830/-

and the same is ~~said~~ to be
out of the loan scheme for
Rs 6.64 lakhs which has
already been sanctioned in
the G.O. of 17.11.45 (b) (A)

A) According to the G.O.
The cost has to be met
both by the Govt. & the
municipality in equal
shares

18) As this work is said
to be of great urgency the
proposal contained in
para 14 supra is for
consideration & orders
The estimate however is
not available for scrutiny

C. M. S. Kumar

M. H. Sengupta

19) I can add nothing to the note of the Asst
P.T.O.

9/11/48
11/11/48

HL 3308

2nd

53686 Secy dated 6-11-48 If the President himself 3747/X
does not observe the rules, govt must ask
him to observe them In this case there is
no estimate, the executive Engineer is
asked to start the work and complete it
early and also obtain sanction of govt
The last is not the duty of the Ex Engr
The President may be asked to send up
the estimate at once for sanction and
the Ex Engr asked not to commence the
work till the estimate is sanctioned or
till govt order that the work may be
commenced prior to the sanction to the
estimate

City Municipal Council Bangalore
furnishing his remarks on the points
raised in letter NO L 5993/ML 62-48-2 dated
the 16th October 1948 on the subject

28) Submitted with reference to "A" in
para 22 supra The President ~~has~~ state
in the above letter that the estimate in question
was forwarded to the Executive Engineer

ML
4644 Estimate for Rs 25,830 for improving water supply
to the N. R. Extension in Mysore Dist.

Water Supply on 28-10-48 for obtaining
sanction of Govt. This is only a repetition
of what he had stated in the last para
of his previous letter dated 26th Oct 1948.
President's reference will have to be sent to the instruction
already given in his behalf.

28) As regards the question of meeting the cost
of the work the President reports that the
question was discussed in detail, along with
the Inspection Note of the Chief Engineer
for Irrigation, by the M. C. on 6-12-48
and has enclosed a copy of the resolution
in his behalf. It is to the effect that-

- (i) 66 lakhs loan should be increased
by Rs 25,830 & the estimate revised to Rs 6,89,
- (ii) that the C. E. be requested to fix the
work executed before this ~~financial~~ calendar
to ensure supply of water during the entire
summer
- (iii) that the excess amount of Rs 25,830 over
the estimate of 66 lakhs be met by the
M. C. & the Govt. equal proportions
and that the entire sum should in the
first instance be advanced by the Govt., the
M. C. share as a loan, repayable in
20 annual instalments as in the case
of the loan of Rs 3,17,325 granted to the M. C.
in connection with the 66 lakhs scheme
under S. No. 2357-6/M. C. 2-45-4 & 12-14-4

ME 4815 Estimate for R-25-030 for improving water off
4644 the R-R Extension in Arizona Ab-

(iv) and finally, let the Executive Engineer take supply. He should be instructed to put the work on hand immediately in anticipation of sanction of Govt.

26-11-48 30) It is not clear whether the estimate sanctioned over three years back can be revised now as suggested to include the work and whether it would not be better to sanction the work separately. The remarks of the Chief Exp. for Information Dept. perhaps be called in on his behalf.

5) the estimate for Rs 25830 for the
above work and requesting

rel Improving water supply to V.R. Nagar
7367

Early sanction of Govt. Grants

40) Embodied with reference to
para 31 supra

41) The Chief Engineer for Hyderabad
states that there is ^{at present} only a saving

v) of Rs 8820 from the 6 64 lakhs scheme
According to present expectations
and that it is not possible to
say, at this stage whether there
would be any savings at all
The Engineer suggests that this
scheme for Rs 25,830 may be
sanctioned as supplemental

3) The estimate for Rs 6 64 lakhs
for immediate improvement of
water supply to Begum City

000
293 LR

in view of the urgency of the
matter sanction may be accorded to

The estimate for Rs 25,830 for the at
the cost will have to

A

met in - and proportion by the
 part of the self as in the case
 of the estimate for Rs 6 64 lakhs for
 taking up the ^{first stage 2} improvement of waste disposal
 - in any case

43) It is stated that a saving of Rs
 8600 is likely to accrue out of this
 above estimate. But it is stated that
 it is not possible to anticipate
 any savings at present. Taking credit for
 the above amount the balance that
 will have to be met is Rs 25,830 - 8600
 = Rs 17,210. This will have to be met
 - in equal proportions by the ^{first} ^{stage} ^{improvement}
 (Rs 8600) (Rs 8600)

B

There is no separate provision to meet
 this extra amount of state funds if
 approved, the above amount ~~will~~ will
 be met out of the ^{head 30 -} ^{public} ^{works} ^{department}

amount to be saved under the scheme
of water supply improvement to Mysore city
sanctioned at a cost of Rs 6 64 lakhs

83) In the meantime, the president, Mysore
city Municipal Council, made a Reference
to this effect that 8" c.i. pipes released
from the military camps are in store
with the Executive Engineer, Water supply
Division, Bangalore, and that they could be
made use of to lay the main referred
to above if made available

84) The ^{Engg.} was thereupon Requested
to furnish information in the following
particulars

(a) The total amount of the estimate
for the present work including the
extra charges involved in the use of
8" pipes

(b) The exact amount of savings
from the 6 64 lakhs scheme

(c) The amount to be borne by the
Govt. and the Municipality and the amount
to be advanced as a loan towards the
Municipal share of the cost

85) Accordingly the chief Engineer
has now put up a revised estimate
amounting to Rs 36,408/- for using
8" pipes in lieu of the 6" ones as

28/12/21

Improvement of water supply to Varas maharaja
Ndhalla - Mysore -

Requested

86) A sum of Rs 8,620 is expected to be saved under the 664 tanks scheme deducting this sum, the cost now to be borne as per the Revised estimate will reduce itself to Rs 27,788/-

87) On a 50 50 basis as already ordered in this office letter dated 11 4 29 the grant to be given by Govt would be Rs 13,894/- and the balance which represents the Municipal share of the cost will have to be advanced by the Govt as a loan. A specific Resolution of the Municipal Council would be necessary for granting any loan, which should also dedicate the source for liquidating the loan.

88) Since while suggesting the use of released paper the Municipal Council did not expect the cost to increase ~~through~~ ^{and} as per the actual estimate now received it has been otherwise, the Municipal Council may perhaps be consulted in the first instance before sanctioning the estimate.

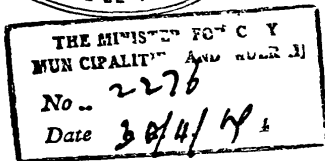

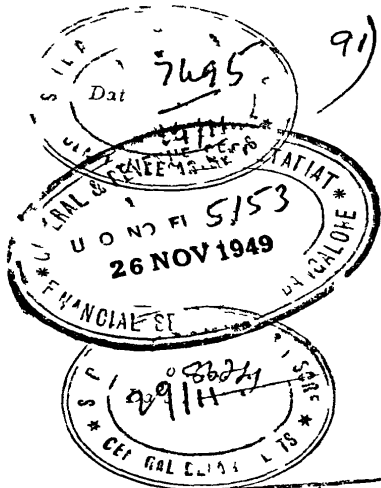

89) A draft letter to the Municipal Council, Mys city is also put up for approval or other orders.

Mae
10/11/28

90) Before sanctioning the revised estimate for Rs 36,408/-

Improvements to Water Supply - Narasimharasa
Mphalla - Mysore

From

The Municipal Council Mysore city
No C₃-P 30/48-49 D/10 1950
Transmits his Report in the matter

97) The 664 Cashes Scheme is Separate.
A Balance of Rs 8,620/- anticipated thereunder
is proposed to be utilized for this work.
With this, the account ^{for road works} would close, and
our account to be sanctioned over for
this work after settling of the above
Balance of Rs 8,620/- should be treated
as Separate to avoid confusion

98) ~~The~~ Times and Courts have now
changed. The Municipal Secretary has observed
on several occasions that the days of
lending money at 3½ % or even 4½ %
interest to Municipalities are over. Hence
the higher rate of 5% interest proposed
seems to be justified

99) The Cost has got to be shared
between the Govt and the Municipality
on a 50:50 basis, and a loan granted
to the Municipality for meeting its
share of cost. Now that the estimate
is received from the Chief Engineer
and the share to be borne by each is
definitely known it is necessary that
a specific Resolution ^{is} obtained approving
the estimate, and also for the loan required,
indicating the source of repayment, and
agreeing to the payment of the Revised Rate

SUBJECT Providing water supply to Narasimha
raja Mohalla, Mysore City.

=====

7
In order to improve water supply to the Narasimharaja Mohalla, the Mysore City Municipal Council in its resolution dated 25th August 1948 approved of an estimate for Rs 25,830/= towards laying 6" C I Main (from the Ediga tank and linking it to 6" C I line) in Asoka Road and proposed that the work may be taken up as part of the scheme for the immediate improvements of water supply in Mysore City sanctioned at a cost of Rs 6 64 lakhs in Government Order No L 3674-6/M1 67-45-4 dated 12th November 1945

The Chief Engineer pointed out that the saving in the scheme sanctioned for Rs 6 64 lakhs was expected to be not more than Rs 8,620/= and that this estimate may be sanctioned as supplemental to the estimate for Rs 6 64 lakhs, any difference in the cost being met in equal proportions between the Government and the Municipality. This had the approval of the Municipal Council also as per its resolution dated 6th December 1948. But in view of its slender finances, the Municipal Council requested that a loan equal to the Municipal share of the cost may be given by the Government.

As the matter was urgent, the Chief Engineer was permitted in this office letter dated 11th April 1949 to proceed with the work pending final orders, and the Municipal Commissioner was requested simultaneously to arrange for placing the Municipal share of the cost at the disposal of the P W Department. But the work could not be commenced quickly owing to the difficulty of securing pipes.

In the meantime, the Municipal President wrote to say that 8" diameter pipes released from the Military camps were in stock with the Executive Engineer, Water Supply Division, Bangalore, and they could be used to ~~sk~~ lay the above mains without exceeding the cost. The Chief Engineer, who was requested to arrange for their supply, ^{intimated} informed that the use of pipes of bigger section would involve ~~an~~ increased expenditure.

Accordingly, a revised estimate amounting to Rs 36,408/- was sent up by the Chief Engineer and after setting off a sum of Rs 8,620/- expected to be saved from the Rs 6 64 lakhs scheme, provision was required to be made for a further expenditure of Rs 27,788/-

As regards meeting this excess expenditure, it was suggested that the Municipal Council and the Government may share it in equal proportions as ordered in this office letter dated 11th April 1949. The Municipal Council ^aagreed to such sharing in its resolution dated 11th February 1950 and requested early orders for the payment of the Government share of Rs 13,894/-

There is no specific source from which this grant could be given. The Financial Secretary, who was consulted, ~~has~~ stated that if this work cannot be postponed, the only way of providing funds is by a re-appropriation from Town Improvement and Water Supply Grants, and that no other source is possible.

When the file was submitted to the Minister for Local Self Government, he was pleased to minute as follows -

"A number of water supply schemes relating to Town and Minor Municipalities is pending for a long time. We have already cut down the grant in the present budget from Rs 6,00,000/- to Rs 5,00,000/-. It is not desirable to further reduce the grant as the demand from other Municipalities is very much more than the budget allotment. This grant which is provided in the budget is purely meant for Town and Minor Municipalities but not for City Municipality. Therefore, I feel, re-appropriation is not desirable. A special grant of Rs 13,894/- may be given for the water supply scheme in question."

The Minister for Finance also agreed with the above views of the Minister for Local Self-Government. The file was sent to the Financial Secretary for indicating the source of giving the special grant in the light of the above minutes of the Ministry but he again noted that a special grant in the absence of a contingent fund is not possible, and re-appropriation is the only way. Thereafter the Minister for Local Self-Government was (pleased to minute as follows -)

"Council note may be put up after perusal by the Hon'ble Finance Minister."

When the file was ^{after} submitted to the Finance Minister, he was ^{22/4} pleased to observe as follows -

"What is the source of the special grant? It could only be either by re-appropriation or by ~~going~~ ^{going} to the Legislature with a demand. Is there any other way?"

Even with reference to the above observation of the Minister, the Financial Secretary has reiterated his previous opinion that it could only be by re-appropriation, as additional grant is not possible without a 'Contingency fund' which has since been constituted

The Chief Minister having ordered the disposal of the question at a meeting of the Council, a Council note is prepared and submitted

The points for orders are -

- 1 Sanction to the revised estimate for Rs 36,408/- for the improvement of water supply to the Narasimharaja Mohalla in Mysore City
- 2 Sharing the cost equally between the Government and the Municipality, after setting off the anticipated savings of Rs 8,620/- from the Rs 6-64 lakhs scheme, and
- 3 Sanctioning a special grant of Rs 13,894/- towards meeting the Government share of the cost from out of the Contingency Fund of the State of Mysore

COUNCIL RESOLUTION

"
"The Council approves of the estimate for Rs 36,408/- for the improvement of water supply to the Narasimharaja Mohalla at Mysore, the cost, after setting off the anticipated savings of Rs 8,620/- from Rs 6 64 lakhs scheme, being met equally between the Government and the Municipal Council. The Government share of the cost viz , Rs 13,894/- will be given as a special grant from out of the 'Contingency fund of the State of Mysore "

by Secy)

SUBJECT: PROVIDING WATER SUPPLY TO NARASIMHARAJA-
LOHALLA, MYSORE CITY.

9/11/58
15/11/58

In order to improve water supply to the Narasimharaja Lohalla, the Mysore City Municipal Council in its resolution dated 25th August 1948 approved of an estimate for Rs.25,830/- 6" C.I. Main from the Ldiga tank, and linking it to Lohalla via the Ldiga Road and proposed that the work may be taken up as part of the scheme for the immediate improvements of water supply in Mysore City sanctioned at a cost of Rs.6.64 lakhs in Government order No.L.3674-6/11.67-45-1, dated 12th November 1945.

The Chief Engineer pointed out that the saving in the scheme sanctioned for Rs.6.64 lakhs was expected to be not more than Rs.8,620/- and that this estimate may be sanctioned as supplemental to the estimate for Rs.6.64 lakhs, any difference in the cost being met in equal proportions between the Government and the Municipality. This had the approval of the Municipal Council also, as per its resolution dated 6th December 1948. But in view of its slender finances, the Municipal Council requested that a loan equal to the Municipal share of the cost may be given by the Government.

As the matter was urgent, the Chief Engineer was permitted in this office letter dated 11th April 1949 to proceed with the work pending final orders, and the Municipal Commissioner was requested simultaneously to arrange for placing the Municipal share of the cost at the disposal of the P.W. Department. But the work could not be commenced quickly owing to the difficulty of securing pipes.

In the meantime, the Municipal President wrote to say that 8" diameter pipes released from the Military camp were in stock with the Executive Engineer, Water Supply Division Bangalore, and they could be used to lay the above mains without exceeding the cost. The Chief Engineer, who was requested to arrange for their supply, intimated that the use of non bigger section would involve an increased expenditure.

Accordingly, a revised estimate amounting to Rs.36,403/- was sent up by the Chief Engineer and after setting off a sum of Rs.8,600/- expected to be saved from the Rs.6.64 lakhs scheme, provision was required to be made for a further expenditure of Rs.27,783/-

As regards meeting this excess expenditure, it was suggested that the Municipal Council and the Government may share it in equal proportions as ordered in this office letter dated 11th April 1949. The Municipal Council agreed to such a sharing in its resolution dated 11th February 1950 and requested early orders for the payment of the Government share of Rs.13,894/-

There is no specific source from which this grant could be given. The Financial Secretary, who was consulted, stated that if this work cannot be postponed, the only way of providing funds is by a re-appropriation from Town Improvement and Water Supply Grants, and that no other source is possible.

When the file was submitted to the Minister for Local Self Government, he was pleased to minute as follows:-

"A number of water supply schemes relating to Town and Minor Municipalities is pending for a long time. We have already cut down the grant in the present Budget from Rs.6,00,000 to Rs.5,00,000/- It is not desirable to further reduce the grant as the demand from other Municipalities is very much more than the budget allotment. This grant which is provided in the Budget is purely meant for Town and Minor Municipalities but not for the City Municipality. Therefore, I feel, re-appropriation is not desirable. A special grant of Rs.13,894/- may be given for the water supply scheme in question."

The Minister for Finance also agreed with the above views of the Minister for Local Self-Government. The file was sent to the Financial Secretary for indicating the source of giving the special grant in the light of the above minutes of the Minister but he again noted that a special grant from the Government is the only consistent fund is not possible.

was pleased to minute as follows:-

"Council note may be put up after perusal by the Hon'ble Finance Minister

when the file was again submitted to the Finance Minister, he was pleased to observe as follows:-

"What is the source of the special grant? It would only be either by re-appropriation or by going to the Legislature with a demand. Is there any other way?"

Even with reference to the above observation of the Minister, the Financial Secretary has reiterated his previous opinion that it could only be by re-appropriation, as additional grant is not possible without a "Contingency Fund" which has since been constituted.

The Chief Minister having ordered the disposal of the question at a meeting of the Council, a Council note is prepared and submitted.

The Points for orders are:-

1. Sanction to the revised estimate for Rs. 36,408/- for the improvement of water supply to the Narasimharaja Mohalla in Mysore City.
2. Sharing the cost equally between the Government and the Municipality, after setting off the anticipated savings of Rs. 8,620/- from the Rs. 6.64 lakhs scheme, and
3. Sanctioning a special grant of Rs. 13,894/- towards meeting the Government share of the cost from out of the "Contingency Fund" of the State of Mysore.

COUNCIL RESOLUTION

"The Council approves of the estimate for Rs. 36,408/- for the improvement of water supply to the Narasimharaja Mohalla at Mysore, the cost after setting off the anticipated savings of Rs. 8,620/- from Rs. 6.64 lakhs scheme, being met equally between the Government and the Municipal Council. The Government share of the cost viz., Rs. 13,894/- will be given as a special grant from out of the "Contingency fund of the State of Mysore."

Secretary to Government,
L.S.O. Department.

OFFICE OF THE PRESIDENT
CITY MUNICIPAL COUNCIL MYSORE,

Date

From

T VENKATARAMANIAH,
President City Municipal Council
MYSORE

To

The Iron and Steel Controller,
Bhadravati.

Sir,

Subject:- Supply of 6" C.I. pipes to the Vanivilas Water Works in connection with the execution of the relating to improving water-supply to Narasimharaja Extension.

I have the honour to state that the question of improving water-supply to Narasimharaja Extension in Mysore City was taken up urgently as a result of numerous complaints received from the residents of the extension. An estimate for Rs. 25,830/- prepared in this connection has been sanctioned by the Council and forwarded to Government for early sanction with a request that the work may be ordered to be put in hand immediately so that there should not be any complaint of water scarcity to the residents of the locality during the ensuing summer. It is learnt from the Superintendent, V.V. Water Works, Mysore, that action has been taken by the Executive Engineer, Water Supply Division, Bangalore, accordingly and an indent was placed with you for a length of 5000 feet (420 pipes of 12 ft each) of 6" C.I. pipes and that a reply has been sent by you in response to this indent that it is not possible to supply the pipes in one lump and that the supply of the pipes would be made in 7 instalments.

I wish to bring to your notice in this connection that scarcity of water-supply in Narasimharaja Mohalla is very acute and the new pipe line has to be laid without any delay. It is learnt that the work has been held up only on account of the non receipt of the supply of pipes. I request you kindly

to see your way for the supply of the above pipes in
one lump as a very special case.

Yours faithfully,

(sd) T Venkataramaniah

Sir,

In continuation of this Office Letter No.C3.P.30/48-49 dated 11/2/49 in regard to the immediate supply of 6" diameter C I Pipes for laying the line to provide sufficient supply of water to the Narasimharaja Colony in Mysore City, I write to state that it is learnt ^{that} 8" diameter pipes released from the military camps are in stock with the Executive Engineer, Water Supply Division, Bangalore. These pipes can be made use of to lay the main referred to above. It is presumed that, as they are the released pipes, their present cost, after making allowance for depreciation will not exceed the sanctioned estimate rates for the purchase of 6" diameter pipes. I therefore request that necessary instructions may kindly be issued to the Water Supply Division, Bangalore, for supplying the required number of 8" pipes to the Superintendent, Vani Vilasa Water Works, Mysore, forthwith ~~so~~ so that the work relating to the supply of water to the Narasimharaja Mohalla may be pushed through and completed before the summer which is fast approaching, as the complaints regarding water scarcity in the area are on the increase.

To

The Chief Engineer
- for Irrigation in Mysore,
Bangalore.

Sir,

Re:- Water Supply to Narasimma Faja ^{Mahalla} ~~Salang~~,
at Mysore.

With reference to your No. 9332/L dated 24-3-1949 forwarding a copy of letter addressed to Secretary to Government, General Department, Bangalore, I wish to state that the rate provided in the estimate for 6" pipe is Rs. 3/6/- per Rft. whereas the rate for 8" pipe released from Military Works is Rs. 4-7-0 per Rft. which involving an excess of Rs. 5,630/- over sanctioned estimate apart from other excesses due to Specials etc. Further, the length of 6" pipe provided in the estimate is 12 feet long whereas the 8" pipes are only 9 feet long. This will involve greater number of lead joints and there will be excess under laying charges also due to increase in weight.

P.T.O.

- 2 -

Further, there will be in all about Rs. 8,000/- 'excess' over the estimate.

Yours faithfully,
Sd/-M.N.Ramakrishna,
Executive Engineer,
Water Supply Division.

Subject:- Adequate water supply to N R Extension,
Mysore City

I have the honour to state that numerous complaints were received from the residents of Narasimharaja Extension about the difficulty they are undergoing for want of adequate water supply to them. Several mass petitions also were received in this behalf. The Executive Engineer, Water Supply Division and also the Superintendent, V.V Water Works were then addressed in the matter. In reply to the above, an estimate for Rs 25,830/- for improving the water-supply in the area by laying a 6" C I main from the Ediga tank (which is the highest point in the locality) and linking it to the 6" C.I.line in Asoka Road was received from the Executive Engineer, Water-Supply Division for obtaining sanction of the Municipal Council. The Council felt that the cost of the estimate is a very heavy one and cannot be met out of the normal budget provisions for water-supply improvement in the current year's budget, as it will be prejudicial to the other minor routine estimates of water-supply works that may be received from the water works Department from time to time during the year. It is ascertained from the Superintendent, V.V Water Works, that the question of taking up the work of extra filters under the 6 64 lakhs scheme is not going to be taken up and as such there would be savings of Rs 40,000 in the above scheme. Therefore the cost of this estimate for Rs.25,830/- in question could be conveniently ~~made~~ ^{met} out of the above savings. The Council therefore felt that this

X (RPA)

should be counted as one of the items of making immediate
water-supply ^{improvement} arrangements ⁱⁿ Mysore City as by this work,
the whole extension will be benefitted by adequate water-
supply and the complaints that are being received every-
day can be put an end once for all. They have accordingly
resolved at their meeting held on 11th September 48
to request Government to sanction the above estimate out
of the 6 64 lakhs scheme as recommended by the Managing
Committee. In enclosing herewith copies of the resolutions
of the Managing Committee and the Council, I request you
kindly to obtain immediate orders of Government to the
resolution of the Council.

Yours faithfully,

O. K. S. S.

THE MINISTER FOR CITY
MUNICIPALITIES AND MUNICIPAL
No T 450
Date 4-10-1948

In enclosing herewith a copy of the letter addressed to the Secretary to Government, Revenue Department in the matter of obtaining sanction to the estimate for Rs. 25,830/- for providing adequate water supply to the N.R. Extension, Mysore City, I write to state that the question of providing water supply to this locality is very urgent as repeated complaints are being received from the residents of the locality and it has become very difficult to face the complaints for want of some arrangement required to be made for supply of water. In view of the urgency of the work, the ways and means of meeting the above cost were consulted with the Water works Department who have replied that the above work may be met out of the savings that would be effected in the 6.64 lakhs scheme under the provision made for construction of filters under the scheme which is not going to be taken up at present and results in a savings of Rs. 40,000/- . I therefore request you therefore kindly to have orders passed immediately in the matter and issue direct for the work being put in hand without any further delay, so as to avoid complaints from the public.

To

Rajasevasakta
Sri Pamadi Subbaramasetty,
Minister for City Municipalities,
Old Public Offices,
Bangalore

Yours Sincerely,

O Subbaramasetty
11/10/48

Copy of letter dated No. C2.P.R. 30/ Enc. one dated 29-9-48
48-49
from the President, City Municipal Council, Mysore to the Secretary
to Government, Revenue Department, Bangalore.

Subject:- Adequate water supply to N.H. Extension, Mysore
City.

I have the honour to state that numerous complaints were received from the residents of Narasimharaja Extension about the difficulty they are undergoing for want of adequate water supply to them. Several mass petitions also were received in this behalf. The Executive Engineer, Water supply Division and also the Superintendent, V.V. Water Works were then addressed in the matter. In reply to the above, an estimate for Rs. 25,830/- for improving the water supply in the area by laying a 6" C.I. main from the Ediga tank (which is the highest point in the locality) and linking it to the 6" C.I line in Asoka Road was received from the Executive Engineer, Water Supply Division for obtaining sanction of the Municipal Council. The Council felt that the cost of the estimate is a very heavy one and cannot be met out of the normal budget provisions for water supply improvement in the current year's budget, as it will be prejudicial to the other minor routine estimates of water supply works that may be received from the water works Department from time to time during the year. It is ascertained from the Superintendent, V.V. Water works, that the question of taking up the work of extra filters under the 6.64 laks scheme is not going to be taken up and as such there would be savings of Rs. 40,000/- in the above scheme. Therefore the cost of this estimate for Rs. 25,830/- in question could be conveniently met out of the above savings. The Council therefore felt that this should be counted as one of the items of making immediate water supply improvement arrangements in Mysore City as by this work, the whole extension will be benefitted by adequate water supply and the complaints that are being received every day can be put an end once for all. They have accordingly resolved at their meeting held on 11th September 48 to request Government to sanction the above estimate out of the 6.64 lakhs scheme as recommended by the Managing Committee. In enclosing herewith copies of the resolutions of the Managing Committee and

- 2 -

the Council, I request you kindly to obtain immediate orders of Government to the resolution of the Council.

30/10/48 Sir,

Subject - Estimate for Rs 25,830/- for improving
the water supply to N R Extension in Mysore City

With reference to your letter No. L 3893/ML 62-48-2 dated 16-10-1948 regarding the above subject, I have the honour to state that much difficulty is being felt for water in Narasimharaja Mohalla and there was a large number of deputations about the same. The ladies of the locality also waited on a deputation and requested that immediate relief be given to them in the matter of water-supply to their locality. Thereupon the Superintendent, V V Water Works was requested to send an estimate for giving relief to this locality. He sent an estimate for Rs 25 830/- and the same was placed before the Managing Committee, who resolved at their meeting held on 25-8-1948 that in view of the fact that this is a major original improvement work and not a mere laying of a sub-main, the cost should be treated as part of the loan scheme and not ^{an} ordinary work, and that the cost of this estimate should be included in the 6 64 lakhs loan scheme sanctioned for the short range improvement of water-supply to the City. This was approved by the Council at their meeting held on 11-9-1948. As such, there does not seem to be any necessity for placing the subject before the Council once again. I therefore request that sanction of Government may kindly be accorded to the estimate, the cost of the same being met out of the loan scheme. I also

enclose a copy of letter No.387 dated 7-9-1948 from
Superintendent, V.V. Water works, stating that this
may be met out of the savings expected in the above
The estimate has been countersigned and sent to the Ex
Engineer, Water Works ~~Dept~~ Supply Division, Bangalore, f
putting up the work on hand in view of the urgency I
this day forwarded a copy of this letter to him with a r
that the estimate may be sent to Government for obtaining
necessary sanction and for the completion of the work ca.

Expected
to be sent
to Government
for sanction
for

Yours faithfully,

O Sridhar
PRESIDENT. 26/10

snr

Copy of letter No. 387 dated 7-9-48 from the Office of the Superintendent, Vani Vilas water works, Mysore to the Executive Engineer, Water supply division, Bangalore and a copy thereof to the president, City Municipal Council, Mysore.

Sir,
Re - Laying a 6" C.I. Main from Ediga tank and linking the same to 6" C.I. line in Asoka Road, to improve water supply to N.R. Mohalla, Mysore, est 25,830/- /

I have the honour to inform you that much difficulty is being felt to fill up the R.C.C. Tank at Narashimharaja Mohalla. In spite of pushing large quantity of water at Filters, we are able to fill up only three to four feet of water daily which is inadequate to supply the whole Mohalla as extensions are being formed day to day.

Even in rain season, now frequent complaints are being received from the residents for inadequate supply of water when Municipal President, was approached to sanction the estimate vide No. 3544 dated 7-5-48, he suggested to meet the cost of the estimate for this work from the savings of 6.64 lakhs scheme.

In this connection I wish to bring to your kind notice that at present we are not taking the work of extra filters and hence there is a savings of Rs. 40,000 in the 6.64 lakhs improvement scheme and the cost of the estimate of Rs. 25,830, of the above work can be met out of savings in the above scheme. It is found very urgent to take up the work of or otherwise the whole Mohalla will suffer for want of water. I request necessary instructions may be given to place orders for 6" C.I. Pipes and specials from Bhadravati and proceed with the work immediately.

INSPECTION NOTE OF THE CHIEF ENGINEER FOR IRRIGATION
ON MYSORE CITY WATER SUPPLY SYSTEM

I inspected the Mysore water supply system with the
Superintendent, Vani Vilas Water Works.

11/11/48
1. PRESENT SYSTEM

The Mysore water supply as it exists is only 'potable' water supply and not filtered water, like Bangalore where the water supplied is entirely filtered. The pumpage is 5 million gallons (M G) while the capacity of filters is only 3.4 M.G., i.e., raw water, though protected with chlorine, to the extent of 1.6 M G or 1/3 of the quantity, is mixed up with filtered water and distributed. It is rather strange that this is being continued in a premier city like Mysore.

Though the rate of supply per head works out to 23 gallons against 12 to 14 gallons in Bangalore, some of the mohallas are not having sufficient supplies at all. There is thus huge wastage in some quarters. This is due to the unmetering of house connections.

There are only two storage pure water tanks of a total capacity of 1 M G, i.e., $\frac{1}{4}$ day's supply - high level $\frac{1}{2}$ million and low level $\frac{1}{2}$ million.

The main defect is also in the distribution system. There are no mains of suitable dimensions for each mohalla, with tappings only ^{for} ~~for~~ sub mains.

2. IMPROVEMENTS - PROPOSED

An estimate for Rs.6.4 lakhs has been sanctioned as an urgent measure and works are in progress. The scheme consists of:-

- 1) another 350 H P. pumping set to be located at Belagola as a stand-by, as all the present three pumps are being worked to full capacity at great risk,
- 2) construction of high level reservoir of 2 M G capacity to feed Idiga, Mandi and Lashkar Mohallas where the supply is at present only by gravity,
- 3) Construction of 4 zone tanks at Idiga, Mandi, Lashkar Mohallas and Krishnamurthipuram,
- 4) Provision of 3 more hard wash filters,

5) Fixing up 500 meters

3. FILTERS

High velocity wash filters of 0.5 M G to deal with the present unfiltered supply of 1.5 M G ensures the entire supply of 5.0 M G to be fully filtered

The first priority should have been given to the construction of filters. But it is deferred on the plea that this may be postponed till the bigger scheme of water supply from Krishnaraj Sagar is considered. As the bigger scheme takes at least a couple of years more, it is necessary to take up this work in the interest of the health of the people of Mysore. Further, nearly 50% of the materials required for these filters, such as ^{iron} pipes, etc., have been purchased. Only cement and certain other materials are required. This work may be taken up immediately and completed as early as possible.

4 ZONE TANKS

The Idiga, Krishnamurthipuram, Mandi and Lashkar Mohalla zone tanks are completed without service connections. It is like putting the cart before the horse. These service connections should have been first taken up before the tanks were built and at least they should have been taken up with the construction of the tanks. Though the tanks are completed nearly 1½ years ago, the tanks are not serviced for want of materials.

The service connections to the former two are, I learn, just completed and this will be in service shortly. Regarding the latter two zone tanks at Mandi and Lashkar Mohallas, the tanks are built, but they are not serviced for want of connecting mains. Immediate arrangements should be made to service these two tanks.

5 HIGH LEVEL RESERVOIRS

The present high level reservoir which supplies Ediga, Narasimharaja and Mandi Mohallas and Lashkar Mohalla has a capacity of 0.5 M G, which is not even enough to supply for 2 hours. A reservoir with a capacity of 2 M G is under construction to supplement the needs. It is held up for want of cement, the

quantity required being 200 tons This may be got and the work completed as quickly as possible Somehow, I feel that the design would have been more economical if the whole structure was underground

6. P U M P S

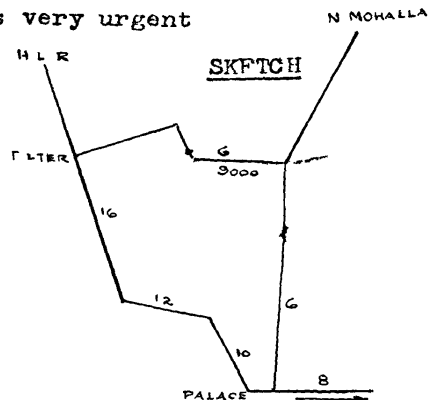

The additional pump has been received and immediate arrangements may be made to erect it as great risk is involved as all the present pumps are working against high heads with no reserve. There may be a serious breakdown.

7. M E T E R S

About 200 meters out of 500 are received. Immediate arrangements may be made to fix them up to houses. This will improve supply to some extent in places where there is insufficiency now.

8 Details of items of estimate and the outlay incurred the estimate of Rs 6.4 lakhs may be submitted with full details of work so far done and that remaining to be done.

9 The President, Municipal Council, stated that supply near Narasimharaaja Mohalla is very bad and that an estimate of Rs 25,000 has been put up by the Executive Engineer for improving the supply. Narasimharaja Mohalla is now fed on a very circuitous path of nearly 20,000 ft., starting from high level reservoir, passing on with a number of tappings in the middle (As noted in sketch). Now Fdiga zone tank is completed. The connection from it to Narasimharaja Mohalla tank line will be only 9000 ft direct line. This ensures plentiful supply to locality. The estimate may be immediately sent up for sanction as the work is very urgent.

10. Whatever may be the improvement, unless independent mains are put up for each of the mohallas, there will be no end to the cry for water. This may be taken up before the bigger scheme of supply from Krishnarajsagar is taken up. It may cost about Rs.3 to 4 lakhs only.

11. It was observed that there was a lot of floc and floating matter in the well of wash filters. There was a lot of dust in the Filter House. As the health of the whole city of Mysore depends on proper water supply, the Filter House and the parts should be kept scrupulously clean. neat and tidy.

Sd. B. S. Narasinga Rao,
Chief Engineer for Irrigation in Mysore.

Subject - Estimate for Rs. 25,830/- for improving
water supply to N R. Extension in Mysore City

With reference to your letter No. 5993/Ml. 62-482 dated

16-10-48, I have the honour to state that the estimate in question was forwarded to the Executive Engineer, Water Supply Division with O3 P R 30/48-49 dated 28-10-48 for obtaining sanction of Government. As regards the second point raised in your letter regarding the cost of the work, it has to be stated that the question was discussed in detail by the Municipal Council along with the inspection notes of the Chief Engineer for Irrigation in Mysore, in the City, received in this behalf, observing that this amount of the estimate in question viz, Rs 25,830/- should have been incorporated in the 6.64 lakhs scheme but was somehow left out. The Council is of opinion that in view of the dire necessity of providing the facilities in the area, the work has to be taken without further delay to avoid the frequent complaints from the residents of the extension. The Executive Engineer, Water Supply Division who was also present at the meeting explained the circumstances of the cases and explained that the question of putting off the construction of filters which was suggested in his previous letter had to be revised in accordance with the Inspection Notes of the Chief Engineer as the formation of filters was also an equally important item of work to be attended to under the 6.64 lakhs scheme as the present process of filtration is not very satisfactory. The Council then resolved that the estimate of Rs. 6.64 lakhs scheme may be revised so as to include the cost of this work viz:

P T O

Rs. 25,830/- as it is to be treated as part of the ^{immediate} ~~short range~~ ^{improvements} scheme and the cost met in equal proportion by the Government and the Municipality. The Council have also further resolved that in view of the present slender finances of the Municipality, the Municipal quota of the cost may be granted repayable as a loan, to the Municipality repayable in 20 ~~equal~~ annual instalments as in the case of the loan of Rs. 3,17,325/- granted to the Municipality in connection with the 6.64 lakhs scheme vide G O No. 2367-6/M1 6245-4 dated 12-11-46 and the Executive Engineer water Supply Division instructed to put the work on hand immediately in anticipation of sanction of the Government.

In enclosing herewith a copy of the resolution of the Council as also a copy of the Inspection Notes of the Chief Engineer for Irrigation in Mysore, I request you kindly to obtain sanction of Government for the revision of the 6.64 lakhs estimate by Rs 25830, and place the extra amount at the disposal of the Water Supply Department so that they may put the work in hand immediately. As the Council are very anxious that water supply should be provided to these areas before the commencement of the next summer to avoid the acute water distress, orders of Government may kindly be obtained in the matter very early.

Yours faithfully,

P. S. Hanumanth
13/12
President.
lego

PSK

ensures the entire supply of 5.0 M.G. to be fully met.

The first priority should have been given to the construction of filters. But it is deferred on the ground that this may be postponed till the bigger scheme of water supply from Arimmaraja Sagar is considered. The bigger scheme takes at least a couple of years more is necessary to take up this work in the interest of health of the people of Mysore. Further, nearly 50% of the materials required for these filters, such as pipes etc., have been purchased. Only cement and some other materials are required. This work may be taken up immediately and completed as early as possible.

4. ZONE TANKS: The Idiga, Arishnamurthypuram, Mand and Lashkar Mohalla zone tanks are completed without service connections. It is like putting the cart before the horse. These service connections should have been first taken up before the tanks were built and at least they should have been taken up with the construction of the tanks. Though the tanks are completed, nearly 1 1/2 years ago, the tanks are not serviced for want of main.

The service connections to the former two are, I learn, just completed and this will be in service soon. Regarding the latter two zone tanks at Mandi and Lashkar Mohallas, the tanks are built, but they are not serviced for want of connecting mains. Immediate arrangements should be made to service these two tanks.

5. HIGH LEVEL RESERVOIR: The present high level reservoir which supplies Idiga, Arishnamurthypuram and Mand Mohallas and Lashkar Mohalla has a capacity of 0.6 M.G. which is not even enough to supply for 2 hours. A new reservoir with a capacity of 2 M.G. is under construction to supplement the needs. It is held up for want of cement, the quantity required being 200 tons. This may be got and the work completed as quickly as possible. Sooner, I feel that the design would have been more economical if the whole structure was underground.

6. PUMPS: The additional pump has been received and immediate arrangements may be made to erect it. The risk is involved as all the present pumps are working against high heads with no reserve. There may be a serious breakdown.

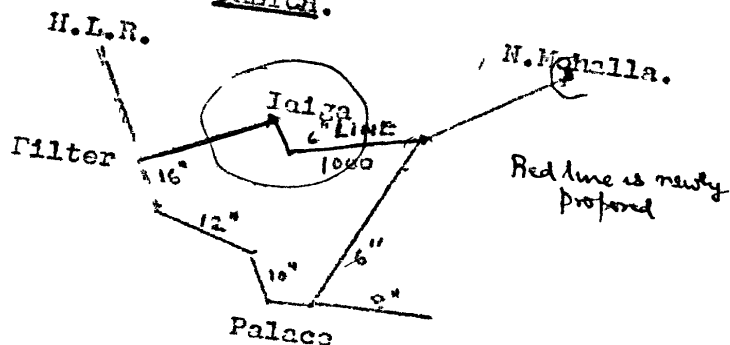

7. TAPPS: About 200 meters out of 500 are ready. Immediate arrangements may be made to fix up the other 300 houses. This will improve supply to some extent in places where there is insufficiency now.

8. Details of items of estimates and the outlay incurred on the estimate of Rs. 6-4 lakhs may be submitted with full details of work so far done and that to be done.

P.T.O

Executive Engineer
 Narasimharaja Mohalla is now
 starting from High level reservoir, passing on with a
 number of tappings in the middle. (as noted in the sketch).
 Now Ediga zone tank is completed. The connection from it
 to Narasimharaja Mohalla tank like will be only 9000 feet
 direct line. This ensures plentiful supply to the locality
 The estimate may be immediately sent up for sanction as
 the work is very urgent.

SKETCH.

10. Whatever may be the improvement, unless independent
 means are put up for each of the Mohallas, there will be
 no end to the cry for water. This may be taken up before
 the bigger scheme of supply from Krishnaraj-sagar is taken
 up. It may cost about Rs. 3 to 4 lakhs only.

11. It was observed that there was a lot of floc and
 floating matter in the well of wash filters. There was
 a lot of dust in the Filter House. As the health of the
 whole city of Mysore depends on proper water supply, the
 filter House and the parts should be kept scrupulously
 clean, neat and tidy.

INSPECTION NOTE OF THE CHIEF ENGINEER FOR IRRIGATION
ON : MYSORE CITY WATER SUPPLY SYSTEM

I inspected the Mysore Water supply system with the Superintendent, Jani Vilas Water Works.

1. PRESENT SYSTEM: The Mysore water supply as it exists is only 'potable' water supply and not filtered water, like Bangalore where the water supplied is entirely filtered. The purpase is 5 million gallons (M.G) while capacity of filters is only 3.4 M.G. i.e., raw water, though protected with chlorine, to the extent of 1.6 M or 1/3 of the quantity, is mixed up with filtered water and distributed. It is rather strange that this is being continued in a premier city like Mysore.

Though the rate of supply per head works out to 23 gallons against 12 to 14 gallons in Bangalore, some of the Mohallas are not having sufficient supplies at all. There is thus huge wastage in some quarters. This is due to the unmetering of house connections.

There are only two storage pure water tanks of a total capacity of 1 M.G. i.e., $\frac{1}{2}$ day's supply - high level $\frac{1}{2}$ million and low level $\frac{1}{2}$ million.

The main defect is also in the distribution system. There are no mains of suitable dimensions for each Mohalla with tappings only from sub mains.

2. IMPROVEMENTS - PROPOSED:

An estimate for Rs.6.4 lakhs has been sanctioned as an urgent measure and works are in progress. ~~The scheme~~ consists of.

1. Another 350 H.P. pumping set to be located at Belgola as a standby, as all the present three pumps are being worked to full capacity at great risk,
2. Construction of high level reservoir of 2 M.G. capacity to feed Idga, Landi and Lashkar Mohallas where the supply is at present only by gravity;
3. Construction of 4 zone tanks at Idga, Landi, Lashkar Mohallas and Krishnamurtanapuram;
4. Provision of 3 more hand wash filters,
5. Fixing up 500 meters.

3. FILTERS: High velocity wash filters of 0.5 M.G. to deal with the present unfiltered supply of 1.5 M.G.

OFFICE OF THE PRESIDENT
CITY MUNICIPAL COUNCIL MYSORE,

Date 14th December 48

From

P SITHARAMAIAH Esq BA BL,
President, City Municipal Council
MYSORE

To

Janab Mohamed Ismail Sheriff, B.A.,
Secretary to Government, General Department,
B A N G A L O R E

Sir,

Subject - Estimate for Rs. 25830/- for improving water supply
in N R Extension.

With reference to your letter No L 6400 dated 13-12-48 on the
above subject, I have the honour to state that the Executive Engineer
Water Supply Division, Bangalore has been this day requested to send
the estimate in question immediately directly to you under intimation
to this office.

As regards the 2nd point raised in your letter under reference
I write to state that the Council have duly approved of the proposal
to enhance the 6.64 lakhs scheme estimate by Rs. 25,830/- which is the
cost of the work in question as per estimate under advertance and further
that the enhanced cost should be met in equal proportion by the
Municipality and the Government and that the entire amount be first
met by Government, half of the same being treated as a further loan
to the immediate improvement scheme of 6.64 lakhs scheme. A reference
to this effect was made to Revenue Secretary with this office No
C3 P R 30/48-49 dated 14-12-48 A copy of the same together with
a copy of the resolution is sent herewith for ready reference

As summer is fast approaching and the public would be greatly
inconvenienced if the work is not put into execution immediately and
completed by that time, I request the favour of kind orders of Govern-
ment, enhancing the 6 64 lakhs scheme by the amount of Rs 25,830/-
and also sanctioning the estimate with direction that the work should,

- 2 -

should be put in hand immediately

Yours faithfully,

P. K. K. K.
President.

*Copy of letter No M2 P R. 30/48-49 dated 14-12-48 from the President, City Municipal Council, Mysore to the Secretary to Government, Revenue Department, Mysore, Bangalore.

Subject - Estimate for Rs 25830/- for improving water supply to N.R. Extension in Mysore City.

With reference to your letter No 5893/M1 62-482 dated 16-10-48 I have the honour to state that the estimate in question was forwarded to the Executive Engineer, Water supply Division Cr P R 30/48-49 dated 28-10-48 for obtaining sanction of - Government As regards the second point raised in your letter regarding the cost of the work it has to be stated that the - question was discussed in detail by the Municipal Council along with the inspection notes of the Chief Engineer for Irrigation in Mysore, in the City received in this behalf observing that this amount of the estimate in question viz , Rs 25830/- ~~should~~ should have been incorporated in the 6.64 ~~lakh~~ lakhs scheme but was somehow left out The Council is of opinion that in view of the dire necessity of providing the facilities in the area the work has to be taken without further delay to avoid the frequent complaints from the residents of the extension The Executive Engineer, Water Supply Division who was also present at the meeting explained the circumstances of the cases and explained that the question of putting off the construction of filters which was suggested in his previous letter had to be revised in accordance with the Inspection Notes of the Chief Engineer as the formation of filters was also an equally important item of work to be attended to under the 6 64 lakhs scheme as the present process of filtration is not very satisfactory. The Council then resolved that the estimate of Rs. 6.64 lakhs scheme may be revised so as to include the cost of this work Viz , Rs 25,830/- as it is to be treated as part of the ~~xx~~ short range Scheme and the cost met ~~x~~ in equal proportion, by the Government and the Municipality The Council have also further resolved that in view of the present slender finances of the Municipality, the municipal quota of the cost may be granted repayable as a loan to the Municipality repayable in 20 annual instalments

- 2 -

instalments as in the case of the Loan of Rs 3,17,325/- granted to the Municipality in connection with the 6.64 lakhs scheme vide G O No 23674-6/111 6245-4 dated 12-11-46 and the Executive Engineer Water Supply Division instructed to put the work on hand immediately in anticipation of sanction of the Government

In enclosing herewith a copy of the resolution of the Council as also a copy of the Inspection Notes of the Chief Engineer for Irrigation in Mysore, I request you kindly to obtain sanction of Government for the revision of the 6.64 lakhs estimate by 25,830/- and place the extra amount at the disposal of the Water Supply ~~Department~~ Department so that they may put the work in hand immediately As the Council are very anxious that water supply should be provided to these areas before the commencement of the next summer to avoid the acute water distress orders of Government may kindly be obtained in the matter very early.

OFFICE OF

The Chief Engineer, Irrigation
in Mysore, Bangalore.

No 9385/4
Encls 5

Date 24-3-49

To
The Secretary to Government,
General Department, Bangalore.

Improvements of water supply to Narasimharaja
Mohalla, Mysore

Sir

With reference to correspondence ending with your

office D.O letter No. L 10126 dated 5-3-1949, on the above subject,
I write to forward herewith for favour of communicating administra-
tive sanction of Government an estimate amounting to Rs 25,830/-
for the above work.

The report and plan accompanying the estimate explain
the necessity for the work and the provision made therein

The estimate has been countersigned by the Municipal
Commissioner, Mysore City Municipality.

In regard to the source of meeting the cost of work,
it may be stated that it is seen from letter No. C3.PR 30/48-49
dated 17-12-1948 addressed to you by the President, City Municipal
Council, Mysore that the cost of the work is proposed to be met
from the 6 64 lakhs scheme by enhancing the amount by Rs 25,830/-
It can be seen from the statement of expenditure against the 6.64
lakhs scheme for the immediate improvement of water supply to
Mysore City (enclosed) that a savings of Rs 8620/- is expected.
As the scheme is not yet completed, it is not possible to say
at this stage whether there will be any savings at all. I therefore
propose that the estimate may be sanctioned as supplemental to the
estimate for 6 64 lakhs for the immediate improvement of water
supply to Mysore City, meeting the cost thereof both by Government
and the City Municipality, Mysore, in equal proportion as in the
case of 6 64 lakhs scheme referred to above.

In view of the urgency of work, I request you

-2-

you kindly to communicate administrative sanction of Government
to the estimate very early with allotment of funds.

Yours faithfully,

Benjamin 9.9.2

Subject Providing Water supply to Narasimharaja
Mohalla Extension
=====

With reference to your letter No L.2501 dated 2-9-49

on the above subject, I have the honour to state that the improvement of water supply to Narasimharaja Mohalla has not yet been started In this connection I wish to invite your kind reference to this office letter No C3 P 30/48-49 dated 13-5-49 forwarding the resolution re bearing the moiety of the increased cost of the work in excess of Rs 25,830/- as per the original estimate and to state that no orders have so far been received in this behalf Consequently the work has not been taken up by the Water Department

The Executive Engineer, Water Supply Division, has in ready stock 8" pipes required for the work The residents of the Mohalla have been complaining of the unsatisfactory state of water supply in the Mohalla In these circumstances I request that government may be pleased to order that the work connected with the improvement be taken up immediately

Yours faithfully,

TO

The Chief Engineer for Roads and Buildings
in Mysore, Bangalore.

SIR,

Subject: providing water supply to Narasimharaja Mohalla,
Mysore.

I am directed to invite reference to the correspondence ending with your letter No.1139 dated 12th August 1949 on the above subject and to state that the further report promised therein has not yet been received. In the meanwhile, the President, Mysore City Municipal Council has reported that the work has not been taken up with the result that the residents of the Mohalla have been complaining of the unsatisfactory state of water supply in the Mohalla. It is stated that the Executive Engineer, Water Supply Division, has in ready stock of 8" pipes required for the work. As such, it is not clear why the work has not yet been commenced in spite of the administrative approval conveyed to the estimate in this office letter No.L.11631/M.L.62-48-6 dated 11th April 1949.

In view of the immediate nature of the work, I am to request you to see that the work is started at once, using 8" pipes therefor.

The revised estimate for the work may be forwarded to Government early, together with the information called for in this office letter No.L.13775/M.L.62-48-8 dated 25th May 1949. No further delay should be allowed to occur and the work started at once.

As regards the expenditure, the same will be met by the Government and the Municipal Council in equal proportions as already intimated in this office letter dated 11th April 1949 referred to above.

Yours faithfully,

Sd. Mir Safdar Hussain.

General Secretary to Government.

To

The Secretary to Government,
General Department, BANGALORE

Improvement of water supply to Narasimharaja
Mohalla, Mysore -----

With reference to correspondence ending with this office letter No 1139/I dated 12-8-49, on the above subject, I write to state that the cost of the above work by laying 8" pipes in lieu of 6" ones as originally proposed will be Rs 36,408/- as per estimate herewith enclosed. The excess over the administratively sanctioned amount of Rs 25,830/- will be Rs 10,578/-

2 As already stated in this office letter No 9385/I dated 24-3-4 the anticipated savings under the estimate amounting to Rs 6 64 lakhs for the Immediate Improvement of Water Supply to Mysore City will be Rs 8,620/- as per statement enclosed. The net cost of the work by using 8" pipes, after deducting the anticipated savings of Rs 8,620/- will be Rs 27,788/- (36,408-8,620/-) which will have to be borne both by Government and the Municipality, Mysore City, in equal proportion

3 As can be seen from the above facts, the Mysore City Municipality has to pay Rs 13,894/- which amount has to be advanced as a loan towards Municipal share of cost

4 In the above circumstances, I request you kindly to communicate administrative sanction of Government to the fresh estimate amounting to Rs 36,408/- for the above work, at an early date. The original

-2-

ing technical sanction of Government thereto after obtaining audit certificate of scrutiny.

As the Secretary to Government, General Department,

To

--- Secretary to Government,
Public Works Department, Bangalore.

Sir

Providing water supply to Naresimharaja Mohalla
Mysore.

With reference to your letter No. 3277/WS. 11-49-4 dated 6-10-1949 forwarding copy of letter No. C3.P 30/409 dated 13-9-49 addressed to the Home Minister by the President, City Municipal Council, Mysore, on the above subject and stating that action may be taken to start the work immediately if other formalities are gone through, I write to inform you that as already stated in this office No 9386/I dated 24-3-1949 an estimate amounting to Rs 25830 for the above work was forwarded to the Secretary to Government, General Department for communicating administrative sanction of Government thereto. Administrative approval of Government to this estimate was communicated by the General Secretary to Government, with his letter No. L.11631/ML. 62-48-6 dated 11-4-49. But subsequently the question of ^{using} rising 8" released pipes for this work in view of the 6" pipes provided for in the estimate was taken up with the General Secretary who finally communicated orders of Government for using 8" pipes, the extra cost being borne both by Government and the Mysore City Municipality in equal proportion (vide his No. 13775/ML 62-48-8 dated 25-5-1949). A fresh estimate amounting to Rs 36,408/- providing 8" released pipes for the work is being separately forwarded to the Secretary to Government, General Department for communicating administrative sanction of Government thereto. The estimate on its return from Government with administrative sanction will be forwarded to you for communicating technical sanction of Government thereto after obtaining audit certificate of scrutiny.

As the Secretary to Government, General Department,

9867
m

-2-

has in the meanwhile, requested in his letter No. L3712 dated 28-9-49 to arrange to start the work at once in view of its urgency, I am permitting the Executive Engineer, Water Supply Division, to start the work immediately.

Yours faithfully,

Sir

In continuation of this office
memo no L 3714 dated 28 9 49
forwarding a copy of the letter addressed
to the C.E. for R & B on the above
Subject, I am directed to state
that the Chief Engineer for R & B
Division has forwarded a Revised
estimate ^{amounting to} Rs 36,408/- for con-
struction of 1 pipe as was of the 6 ones
as ^{has been} originally proposed. A Survey
of Rs 8,600/- is anticipated under
the 6-64 works Scheme, which if
set off against the above the
cost to the Corporation would reduce
itself to Rs 27,788/-.

As regards the meeting of the
Expenditure, the same will have to
be met by the Govt and the Municipal
Council in equal proportions as
already indicated in this office letter
dated 11 4 49. The opinion of the
Municipal Council as to the acceptance

of this Revised estimate was
 be ascertained and estimated if
 as requested in your letter dated 13 12
 any loan is required to meet the
 Municipal share of the cost
 Receipt Resolution & the Municipal
 Council are to be obtained therefor
 as respect of the Revised amount
 now requested, indicating there
 the source from which it has to
 be repaid. The period of Repayment
 and that Rate of interest ^{at 5% per} ~~that would~~
 be paid thereon

The Revised Estimate is also
 herewith sent for reference and

SUB: Providing water supply to Narasimharaja Mohalla, Mysore.

In continuation of this office Memo No L.3714 dated 28th September 1949 forwarding a copy of the letter addressed to the Chief Engineer for Roads and Buildings on the above subject, I am directed to state that the Chief Engineer for Irrigation has forwarded a revised estimate amounting to Rs.36,408/- for using 8" C.I. Pipes in lieu of the 6" ones as had been originally proposed. A saving of Rs.8,620/- is anticipated under the 6.64 lakhs scheme, which if set off against this work, the cost to be borne now would reduce itself to Rs.27,788/-

As regards the meeting of the expenditure, the same will have to be met by the Government and the Municipal Council in equal proportions as already intimated in this office letter dated 11th April 1949. The opinion of the Municipal Council as to the acceptance of this reduced estimate may be ascertained and intimated. If as requested in your letter dated 13th December 1948 any loan is required to meet the Municipal share of the cost a specific resolution of the Municipal Council may be obtained therefor in respect of the revised amount now required, indicating therein the source from which it would be repaid, the period of repayment and the interest at 5% would be paid thereon etc.

The revised estimate is also herewith sent for reference and return.

Yours faithfully,

Sd/- A C Nirvani Gowda,

General Secretary to Government.

Sir,

Subject Providing water supply to Narasimharaja Extension
=====

With reference to your letter No L 6481/31-12-1949 forwarding plans and estimates for a net expenditure of Rs 27,788/- to be incurred in this connection, I have the honour to invite the favour of your reference to this office letter No M5 C 85-16/41-2 (C3 P 30/48-49) dated 14-12-1948 and C3 P 30/48-49 dated 13-5-49 enclosing copies of the resolution of the Municipal Council agreeing to bear half the cost of the original estimate for Rs 25,830/- as originally intimated and a copy of the resolution No 998 dated 7th May 1949 agreeing to ~~xx~~ bear half the cost of the extra expenditure to be incurred owing to the fact that 8" pipes have to be used in stead of 6" pipes The Municipal Council has thus agreed to meet half the expenditure involved just as in the case of 6 64 lakhs scheme The resolution of the council dated 6-12-48 sent with letter dated 14-12-48 makes it clear that the work has to be treated as a part and parcel of the 6 64 lakhs scheme, the entire cost being met by the Government in the first instance, half of it being government grant and the other half being advanced to the municipality The rate of interest for the Rs 6 64 lakhs scheme is 3½% The interest to be charged for the municipality's share of the expenditure on account of improvement of water supply to Narasimharaja Mohalla should not exceed 3½% It is not clear why interest at the rate of 5% is now required to be paid If a formal resolution from the council is required asking for a loan to meet the municipality's share of the cost, the subj

=2=

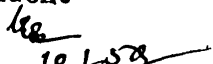

will be placed before the Municipal Council and a resolution
will be sent I request that the interest may be fixed
at the same rate as charged for the loan given to the
municipality in connection with the Rs 6 64 lakhs scheme

Yours faithfully,

Municipal Commissioner

(thru the President)

Sir,

Subject Providing water supply to Narasimha
raja Mohalla, Mysore City

With reference to the correspondence ending with your letter No C3P 30/48-49 dated 10th January 1950 on the above subject, I am directed to state that merely because the savings of Rs 8,620/- anticipated under the scheme of Rs 6.64 lakhs is proposed to be utilised towards meeting the cost of this work, it cannot be treated as part of that scheme as suggested by the Municipal Council ~~with the booking of this outlay of Rs. 8,620/-~~ ^{spend} ~~by way of a saving from the other scheme.~~ ^{The} ~~account for Rs 6.64 lakhs would close~~ Hence ^{there} ~~two~~ should be treated as distinct and separate A specific resolution of the Municipal Council approving the revised estimate for Rs 36,408/- less Rs 8,620/- or Rs 27,788/- for the above work, and also for taking the loan of Rs 13,894/- in this behalf carrying interest at 5% may therefore be obtained and forwarded to Government, indicating therein the source of repayment ^{also} and the number of instalments in which it would be repaid

The ~~terms~~ ^{market} and conditions have now very much changed and the Government ~~is also~~ ^{has also to} paying a higher rate of interest on loans raised for ~~meeting its~~ ^{its} own obligations. ~~as such, the days of lending~~ ^{As such} money at 3½% are over and the rate of 5% proposed for the loan that may be needed by the Municipality, for this work is ^{in order} justified

Yours faithfully,

Bangalore.

(Through the President).

Subject - Providing water-supply to Narasimharaja
Extension.

With reference to your letter No.L.8355 dated 6-2-1950 on the above subject, I have the honour to state that the Municipal Council, before whom your letter was placed at their meeting held on 11-2-1950, were of opinion that the rate of interest asked for by Government is heavy. In view of the fact that the amount of loan to be taken from Government was only Rs 13,894/- (for payment of the Municipality's share of the estimate) the Council felt that the amount may be paid out of Municipal funds and Government requested to pay their quota of the other half of the estimated cost.

They have accordingly resolved that Government may be requested to pay their share of Rs.13,894/- and to make payment of the Municipality's share of Rs.13,894/- ^{from municipal funds} by making due provision therefor in the budget for 1950-51.

In enclosing a copy of the resolution referred to above, I request you kindly to obtain orders of Government for payment of their quota of Rs.13,894/- from State Budget. The Municipality's share of the cost will be paid during the year 1950-51 after the Budget Estimates for the year are sanctioned.

The favour of very early orders is requested in

Re - Improving Water Supply to Narasimharaja Mohalla, Mysore

-oOo-

With reference to your No 7364/I dated 11-2-1950 I write to state that the work has been completed in all aspects and the line has been taken to service. The Mohalla is now having good supply of water and complaints are forthcoming. The final bill of the contractor is pending payment and the contractor is pressing for the payment and also refund of the deposit. It is since 5 months since the work was taken to service and the revised estimate is not yet sanctioned.

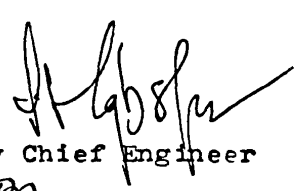

I request kind sanction to pay the bill as there is no deviation nor excess over the quantities. Early orders are solicited as the contractor is reminding this office. The total outlay will be Rs. 34,793/- against Rs. 36,408/- as per revised estimate.

Sd/- M N Ramakrishna,
Executive Engineer,
Water Supply Division,
Bangalore.
